### Far Infrared Rays and Migun Beds

The far infrared rays have outstanding effect on caloric consumption and weight control, burning from 600 to 2,400 calories in a 30 minute session of Migun bed. The infrared thermal system stimulates the consumption of energy equal to that expended in a 6 to 9 mile run. The far infrared rays also flushes out toxins from the lymph areas and from the largest organ of elimination, the skin, and restores a healthy body.

Get Energized. Get Revitalized. Get Migunized.

Migun means beautiful health.
